

SOUTHWEST CORRIDOR TRANSIT DESIGN PROJECT

Meet & Greet

UPCOMING OPPORTUNITIES

Civil Design & CADD

Structural Design & CADD

3D Modelling

Geotech Investigation

Architectural Design (Operation & Maintenance Facility)

Land Survey Services

Water Resources

Environmental Mitigation Design

Stormwater Management

Risk Assessment (project design & constructability)

About SWTP:

Southwest Transit Partners is a Joint Venture between AECOM, David Evans and Associates (DEA) and Parametrix.

When: Friday June 8, 2018
9:30 am (following OAME's AECPT meeting)

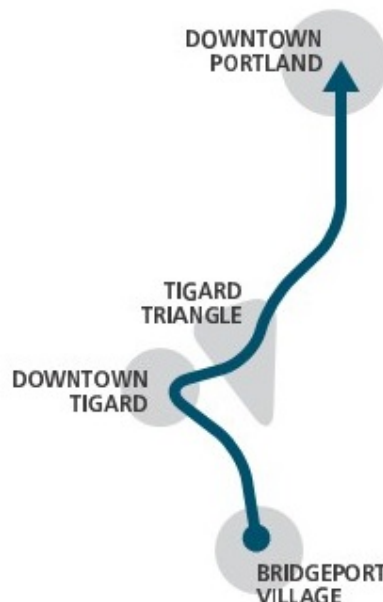

Where: OAME
731 N. Hayden Meadows Drive
Portland, OR 97217

ABOUT THE PROJECT

From Tualatin and Sherwood to Tigard and Southwest Portland, more people are choosing to live, work and play in the Southwest Corridor. The transit system here is taxed, and the roads are congested and unreliable. People walking and bicycling face unsafe conditions moving within and between local communities.

Local leaders throughout this part of our region are studying the best way to address these challenges, so that residents, commuters and visitors can get around safely, quickly and efficiently for decades to come.

The proposed route was developed by partner staff with information from the DEIS process and previous public feedback.
